Access to our online member Directory

Free participation with Communities of Practice (CoPs)

Free membership in the regional ISPE D/A/CH Young Professionals Chapter

Participation in ISPE workshops and conferences at reduced registration fees

Free expert information relevant to your interest and subject areas (CoPs)

Access to Students and Young Professionals

Your annual membership fee

Young Professionals	99 €
Students	25 €
(all information 2017)	

About ISPE

With more than 19,000 members worldwide and more than 1,100 members in the regional chapter Germany / Austria / Switzerland, it is one of the largest not-for-profit associations in the pharmaceutical sector. Members come from the fields of pharmaceutical production, machinery and plant engineering for the pharmaceutical industry, engineering of pharmaceutical companies and independent engineering firms, consulting, universities and authorities.

About ISPE Young Professionals D/A/CH

We are a subgroup of ISPE D/A/CH and we aim to address Young Professionals and students (engineers, biochemists, biotechnologists, chemists, pharmacists, etc.) at the early stages of their career in the pharmaceutical industry. Our network provides opportunities for professional collaboration, exchange of expertise and career development. We offer networking events specifically focused on the needs and expectations of Young Professionals and students. ISPE YP D/A/CH was founded in 2016. Our members have the great opportunity not only to be a part of this network, but also to help in actively developing it.

BENEFITS OF BEING AN ISPE YOUNG PROFESSIONALS MEMBER

Share knowledge/generate knowledge

The linking of production processes with information and communications systems is becoming increasingly important in the context of digitalization and globalization. For this reason, we are focussing on topics as Industry 4.0 / Pharma 4.0, Continuous Manufacturing Processes, Automation and Data Integrity. The adaption of established production processes is a major challenge, which can be facilitated by comprehensive knowledge and exchange with experts.

The objective

To provide information on innovative topics from the pharmaceutical sector, to make them available and to create innovations.

Network Globally

With more than 19,000 members, working meetings, congresses and lecture series, a network of specialists is available. Your own questions can be discussed online or in these personal meetings.

The objective

Global and interdisciplinary collaboration, generating knowledge, sharing experiences and knowledge, benefit from others' experiences.

Career development

- Become a member
- Sharing knowledge
- Networking
- Join our mentoring program

The ISPE Knowledge Pool (Online knowledge databases, specialized literature, workshops, lectures) and the members network provide answers to a wide range of questions from your personal work environment.

With a membership in the ISPE D/A/CH Young Professionals subgroup, you have the opportunity to expand your knowledge as well as to boost your career development.

A win-win situation for all parties involved in the value-added process: for you and for your employer.

Goal

To support you on your career path.

Connecting Pharmaceutical Knowledge

Here's what your colleagues say about the value of ISPE membership

"The coming together of pharmaceutical companies, academic institutions and regulators within the ISPE allows me to pursue new approaches in my daily work and to look outside the box."

Thorsten Böhle, Project engineer process automation, F. Hoffmann-La Roche AG

"Different groups and communication platforms within the ISPE facilitate the exchange with experts, young professionals and students to widen my network and to share and generate expertise."

Zen-Zen Yen, Project engineer, Venture Management, Bayer AG

"ISPE YP Innovation Beyond - As a student and a newcomer, you get the opportunity to make contacts, share expertise and gain a deep insight into the pharmaceutical industry."

Robin Schiemer, Student Biochemical Engineering, Karlsruhe Institute of Technology
